

Concept

+Ability to have many different journals – can be added at the backend

+ Alphabetic category page for all journals

+ Fully SEO optimized for all journal pages, categories, paper pages, etc... (Able to declare it at backend, for example when add a new journal, able to set URL, Meta tags, etc...)

- SEO URL
- SEO meta tags

+ Submit a manuscript instead of article

+article download counts

Payment option, Paypal

After submission of manuscript payment will be collected in pre-approval stage

pre-approval stage >> after the manuscript approved by reviewer, an email with invoice and payment link will be sent to author, once he make the payment status will be changed to approved, can editor assign it to an issue.

So there will be an additional stage for an manuscript(article), named pre-approved.

For each stage changes, an email will be sent to editor(assigned by admin), reviewer(Assigned by editor), and the Author.

Author Account

Author profile:

+ Author biography

-- Title

-- Bio (150 words)

-- Academic Affiliation

--- Postgrade student

--- Teacher

- Lecturer
- Senior lecturer
- Asc prof
- Prof
- Assistant Prof
- Institute / university
- Write in text box

>> Create Article

- Change Article to "manuscript"
- Change category tp "Journals"

Title of Article >> Title of manuscript

Add+ text description for Abstract, Maximum 250 words

Add+ Keywrods, minimum 4 keywords can be auto fill from the database if others add also(Jquery)

Preview manuscript >>

*After submission there will be a PDF created by the system containing all the information submitted using our format:

Title

Author details

Abstract

Content

Editor Account

profile:

- + Author biography
- Title
- Bio (150 words)
- Academic Affiliation
 - Postgrade student
 - Teacher
 - Lecturer
 - Senior lecturer
 - Asc prof
 - Prof
 - Assistant Prof
- Institute / university
 - Write in text box

+Every journal added to the system, can have 1 editor in chief or 2, admin can assign it and register for account.

+Editors in chief can Manage Editions for a particular journal only. Also have access to reviewer under that journal only.

+Manage Category >> only can be accessed by admin which in fact is “Journals” not category.

+Manage Pages >> only can be accessed by admin back-end, must be able to add meta tags, etc...

manage site >> only to be accessed by admin

+ Review cannot see the details of author

Admin Account

Can Manage all accounts (editor, reviewer, etc...) add/ modify

Can Add journal

- Title
- Meta tags
- Category of journal
- SEO FriendlyURL
- Logo

- Issn number for print and electronic (optional, if not set will not appear in website)
- Assign editor in chief
- Assign Peer reviewer
- Focus and scope description (in a list format, can be used by a online text editor not normal text description fiels)
- Abstracting and indexing (this field will be appeared for public based on LOGO views, also linked to reference website, can be choosen tag style. Also this field can be managed by admin, admin can upload logo & link of the reference site, and title, and when adding journal in the system you can choose them using tag style as follow

The image shows a horizontal row of seven tags: 'LEON', 'LEON', 'JACOB', 'LEON', 'LEON', 'JACOB', and 'LEON'. Each tag is in a light blue box with a small 'x' icon to its right. To the right of these tags is a small downward-pointing chevron icon. Further to the right is a blue button with the text 'Assign Now' in white.

Ability to manage content of website

Menu management

Ability to add logo or design changes in all pages.

Journal Page

The followings should be added to the journal page:

- Title
- Logo
- Issn number for print and electronic (optional, if not set will not appear in website)
- editor in chief's name and bio data
- Peer reviewer's list
- Focus and scope description
- Abstracting and indexing (list of all indices)
- Submit button
- List of most downloaded articles
